

## Congratulations on Your Purchase!

Please Register Your Warranty @  
[www.wizardscreens.com/warranty-registration](http://www.wizardscreens.com/warranty-registration)

### WARRANTY

Wizard Screens offers a **Limited Lifetime** Warranty on all components, excluding screen mesh, speed reducers and wood grain finishes, to the original purchaser of the RetractaView Screen from the date of installation.

This warranty is non-transferable and will remain intact for the original purchaser provided the product was installed by an Authorized Dealer and/or factory trained installer and has not been moved or altered in any way.

Wizard's Optional Speed reducers carry a 1 year warranty and Wood Grain finishes carry a 10 year warranty.

Wizard warrants the components shall be free of defects in materials and workmanship. "Defects" are defined in this warranty as imperfections that impact on the utility of the retractable screen. Wrinkles in the mesh or puckering along its edges in itself does not constitute a defect.

Defective components will be replaced free of charge for up to one year from the date of installation. After one year, Wizard will provide replacement components at no charge, but a service installation charge will apply.

The Limited Warranty does not include components that have been damaged by misuse, abuse, unauthorized repair or modification of the screen; normal weathering, fading, scratching, airborne or applied corrosive contaminants, acts of God or other causes beyond the control of Wizard Screens

If a component is defective and you require assistance, please contact your original point of purchase. Please retain your invoice as proof of purchase. Proof of purchase is required for any after sale service.

## **MAINTENANCE & OPERATION**

To ensure your RetractaView™ functions for years of trouble free use it must be maintained and operated in accordance to these guidelines.

### **Use**

Screens should be rolled away completely when not in use. This helps maintain the longevity of your screen and keeps screens clean.

### **Operation**

It is best to guide your screen as it retracts in order to prevent the pull bar from slamming against the housing.

### **Lubrication**

To ensure continued smooth operation of the moving parts of your retractable screen, we recommend keeping a can of dry silicone spray on hand. Spraying the top and bottom rails, after cleaning, will keep them lubricated and free of dirt.

### **Cleaning**

When cleaning be sure not to use corrosive cleaners, as they may damage the painted finish. Track grooves must be kept clean. Remove dust from grooves using a brush, cloth or vacuum. To clean the mesh we suggest vacuuming it with an upholstery brush, being careful not to snag the screen material.

### **Service**

If you require service or have any questions please contact the original point of purchase to arrange a service call.
