

Integrated System **Introduction**

Integrated System

- Building or renovating? Achieve a beautiful, seamless look with the [The Horizon Integrated System](#)
- Welcome the fresh air and sunlight while blocking insects
- Framed 100mm: Single 21' 6" max span; Double 43' max span
- The system incorporates Wizards proven retractable Horizon screen with its fully flush handle, floating upper track, low-profile track, and concealed fixings throughout
- The 3-sided frame option allows the ½" staged lower track to be either recessed with or mounted on top of the floor
- With its large spanning options, low profile construction, and sleek design, the Horizon Integrated System is the ultimate concealable retractable screen

- Compatible with most door systems, including bi-fold, sliding, and stacking doors.

- The frame is fit within a wall cavity after door installation and during rough framing phase. The jamb fillers are temporarily placed to maintain rigidity.

- After finish construction is complete, the screen door and tracks are finally installed. The finish result achieves a discreet look and streamlined operation.

Bi-folding / Stacking door

Horizon 3 Sided Frame
Single and Double Screens

Bi-folding / Stacking door

Horizon 4 Sided Frame
Single and Double Screens

*3-sided use the standard lower track

The Horizon Integrated System will only be warrantied and supported for interior applications - *NOT* exterior!

Orientation of **screen** and **frame** in relation to the door.

AERIAL VIEW

INTERIOR

EXTERIOR
