SmartShade

Measure & Install Guide

Minimum 2 installers required

1. Protect products during transportation.
2. Inspect all products and components *prior* to installation.
3. **Photograph and Report** damaged or missing parts *immediately* to orders@wizardscreens.com and call your sales rep.

If you *are* a Wizard dealer that requires assistance, you can contact:
support@wizardscreens.com
1-888-949-3667
If you *are not* a Wizard dealer, **contact the point-of-purchase**.

REQUIRED TOOLS & HARDWARE

SmartShade

Cable Cutter

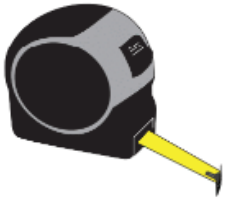
Swage Crimper

1/4” Wrench

2mm rod

Level

Tape Measure

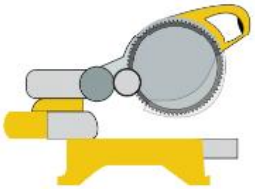


Pencil

Plumb Line

2-way Laser Level Kit

Chop Saw

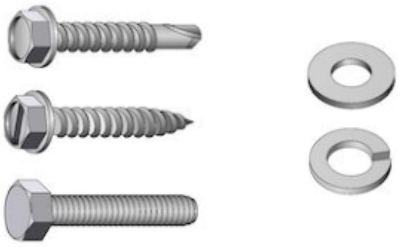


Drill

Step Ladder

Vacuum

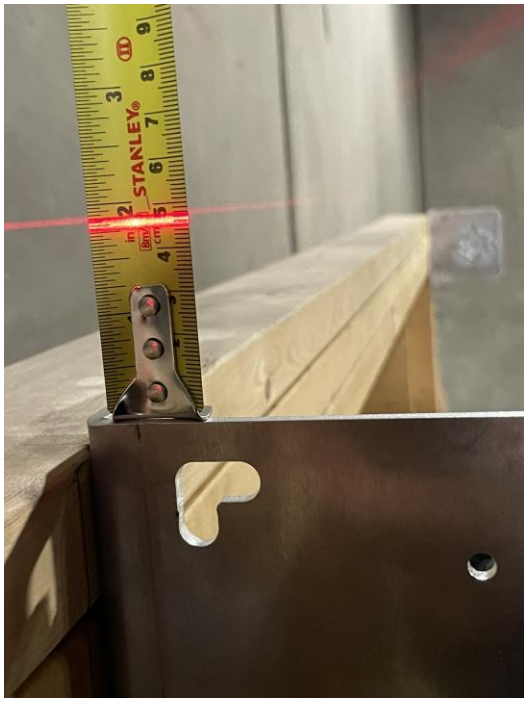
Appropriate Fasteners and Driver Bits



Record measurements

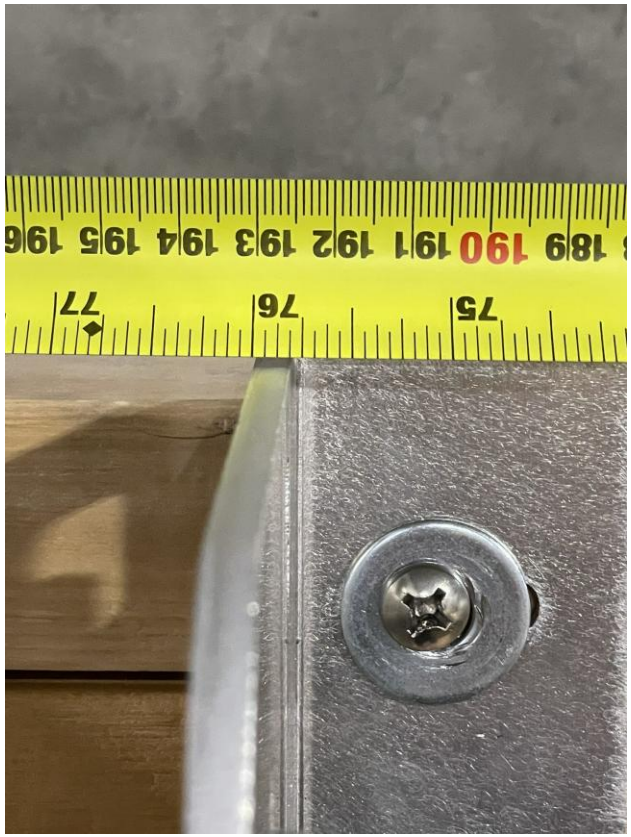
*NOTE: For **in-jamb** applications, consider 3/8” projection of cable whaler

Establish lateral and level marks for brackets.

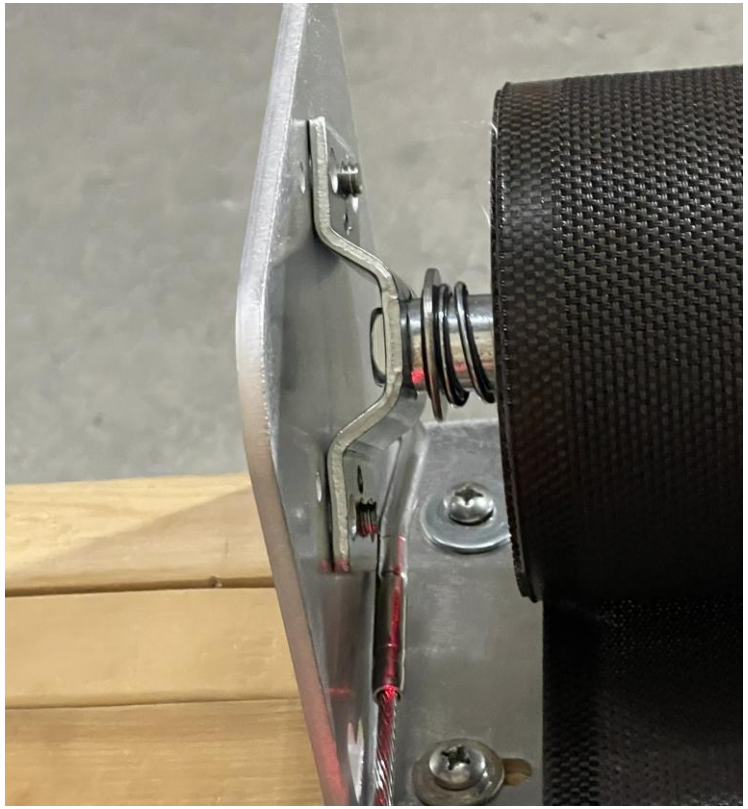


1. Plumb and affix brackets.

2. Check measurement. Adjust position if necessary.



1. Insert idler into bracket, then compress.

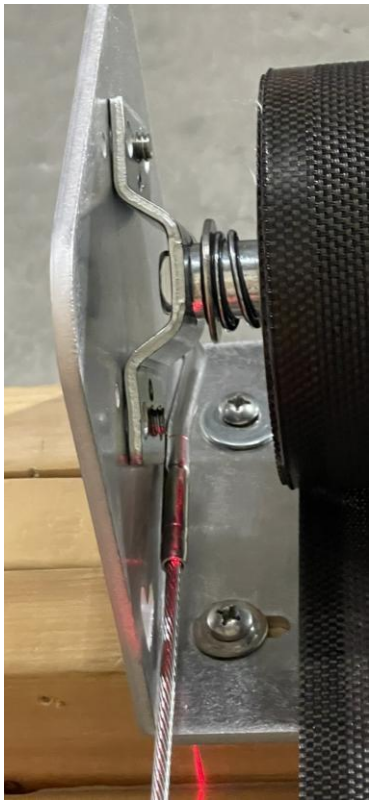


2. Insert motor into crown, pushing until it “clicks”.

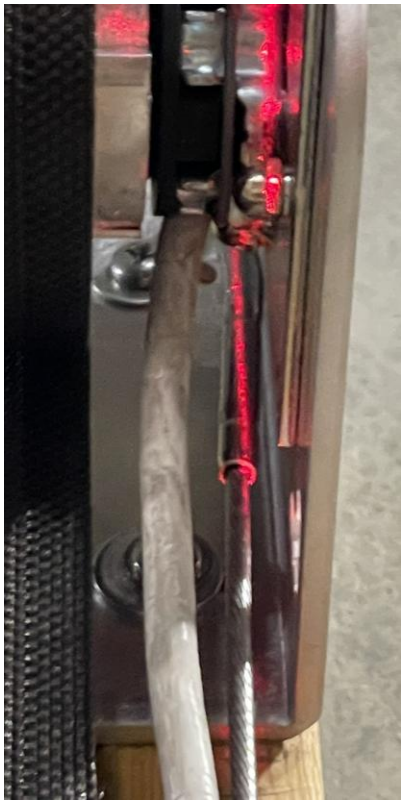
1. Hook cable whalers into bracket notches.
2. Plumb anchor points.
3. Affix cable brackets.

*NOTE: Distance between cables at bottom & top **must be identical**.

FLOOR



FACE

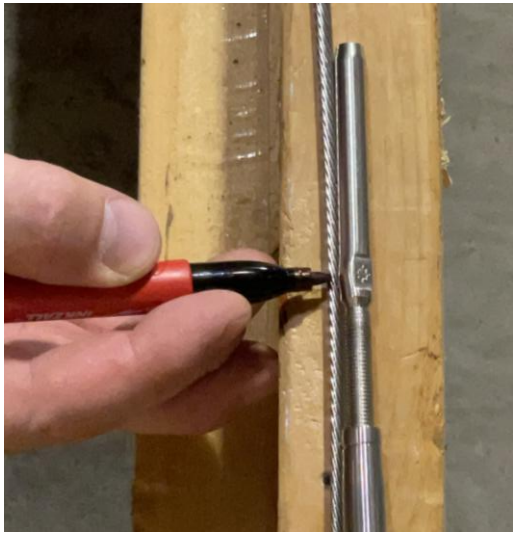


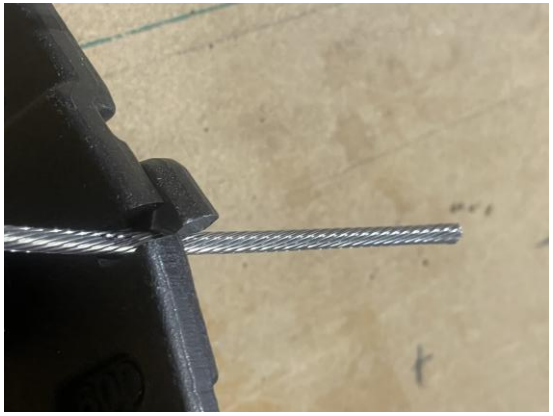
1. Feed:
   a) hem-bar through screen hem (shown); or
   b) bottom-bar along screen zipper (not shown)

2. Feed cables through bar endcaps (hem-bar shown)

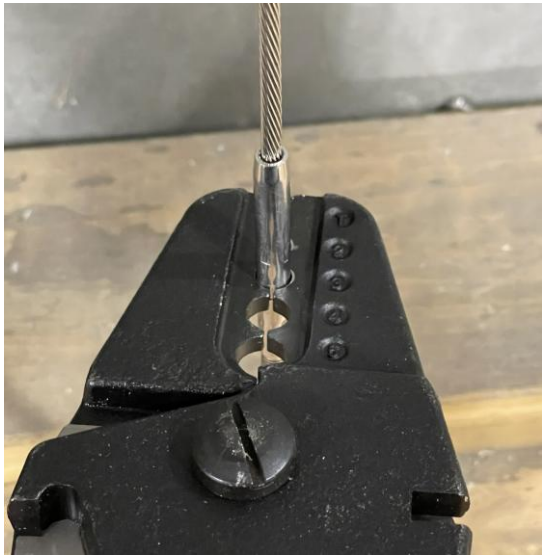
1. Establish equal thread distance on turnbuckle.

2. Mark and cut cable.





3. Insert cable into swage turnbuckle and crimp.



1. To increase tension:
   - rotate turnbuckle by hand; or
   - 2mm rod & ¼” wrench

***Do not over-tension**

2. Tighten nut against turnbuckle.

Program limits.
